

SAUVEREIGN

The gold leaf and precious elements on SAUVEREIGN creations are meticulously handcrafted by master artisans and sealed with lacquer layers to preserve their hue and radiance. With proper care, each piece can last a lifetime and be passed down through generations. As with all precious finishes, minor oxidation, scratches, or chipping may occur over time – this is normal wear, not a defect. Superficial blemishes can be restored by our artisans; please contact a SAUVEREIGN specialist for assistance.

careguide

To ensure your piece *retains its beauty for decades*, we recommend the following care guidelines:

GEMS

Mobilising the hand for countless hours, with audacity, passion, precision and accuracy, realised using innovative and precious media, SAUVEREIGN Gems are one-of-a-kind creations that will stand the test of time if properly cared for, destined to be passed on from generation to generation.

Clean gently with distilled water (not higher than 30°C) and a soft, neutral-coloured, absorbent, non-fluffy microfibre cloth;

Dry thoroughly before wiping with the recommended cloth; the use of brush is not recommended;

Mother-of-pearl or ornamental stones are natural materials and may be easily damaged by improper care;

Avoid contact with abrasive surfaces to prevent scratches;

Avoid exposure to high temperatures and prolonged direct sunlight;

Store individually in the original SAUVEREIGN protective bags when not in use to avoid debris and abrasion; protect from external shock;

Should you require refreshing or polishing services or any specific care, please contact a specialist at one of our SAUVEREIGN boutiques.

FOOTWEAR

Made by hand in Italy using century-old techniques that have been passed down from generations, crafted from the finest leathers of the most beautiful section of each skin, these natural and living materials require and deserve your care and attention.

Never add rubber soles to your shoes, they destroy the shoes' pitch and balance;

Regularly replace your heel tips before they run too low;

Avoid contact with solvent, oil and abrasive surfaces;

Avoid humidity, rain and exposure to direct sources of heat or sunlight;

Keep the leather area clean and dry, occasionally nourish with specialist colourless lotion;

Should the product is wet, dry gently with a soft, neutral-coloured, absorbent, non-fluffy cloth;

Heels and accessories with precious finishes such as gold leaf and/or lacquer can be cleaned with distilled water and dried as per above;

Endeavour not to wear your shoes on consecutive days to allow the leather fibres to rest;

For exotic skins, because of the delicate and precious nature of the material, they must be protected from humidity, water spray and rain. Avoid contact with water, alcohol-based solutions, and exposure to direct sunlight;

To preserve the original shape of the shoes, store with shapers after each use in the SAUVEREIGN protective bags and boxes, away from other leathers or pigmented colours to avoid colour migration.

LEATHER GOODS

Leather is a natural and living material, it will soften and develop natural marks depending on use, such as wrinkles, pores and veins, and a beautiful patina, becoming a unique well-travelled object that is full of character and subtle nuances. Meticulously handcrafted in France from the finest leathers of the most beautiful section of each skin, these natural and living materials require and deserve your care and attention.

All the metal pieces such as locks, buckles, handles are developed and created by SAUVEREIGN exclusively for its creations. They are made in brass and/or zinc alloy, polished by hand, plated in fine gold or palladium.

Do not over pack and carry excessive load to preserve the original shape; stuff with tissue paper to maintain shape and structure;

Avoid prolonged contact between light and dark colours to minimise the risk of colour bleeding;

Avoid humidity, rain and exposure to sources of heat or direct sunlight;

Should the product is wet, dry gently with a soft, neutral-coloured, absorbent, non-fluffy cloth;

Cleaning with solvents or chemicals is not recommended, which can compromise the quality and integrity of the leather;

For exotic skins, because of the sensitive and precious nature of the material, they must be protected from humidity, water spray and rain. Avoid contact with water and liquid, alcohol-based solutions, and exposure to direct sunlight;

Store individually in the original SAUVEREIGN protective bag and box when not in use.

SAUVEREIGN ZOHIKO

Over 300 years of dedication and savoir-faire, a legendary master of Kyoto-style lacquerware, an extraordinary meeting of minds.

Avoid contact with abrasive surfaces to prevent scratches;

Clean the product with a dishcloth or sponge soaked in thinned neutral detergent in lukewarm water, and wipe with a clean, dry and soft microfibre cloth;

Mother-of-pearl or ornamental stones are natural materials and may be damaged by improper care;

Avoid exposure to high temperatures;

Store individually in the original SAUVEREIGN protective bag when not in use to avoid debris and abrasion; protect from external shock;

Should you require refreshing or polishing services or any specific care, please contact a specialist at one of our SAUVEREIGN boutiques.

CARPENTRY

Created as a small series, each handle is meticulously crafted by hand to the highest standards of Swiss precision with deep respect to the tradition of cabinet making. Great care has been applied to finish each piece, favouring and highlighting its enduring beauty. Never add rubber soles to your shoes, they destroy the shoes' pitch and balance;

Avoid contact with abrasive surfaces to prevent scratches;

Avoid exposure to direct sunlight and high temperature for prolonged periods of time as this will accelerate the ageing process and cause the timber to discolour or even crack and/or dry out;

Use a microfibre cloth to dust and clean, if any spillages occur wipe immediately;

Monitor the relative humidity of the storage environment keeping it to the average of 45-50%; extreme changes in humidity can cause shrinking/splitting;

Do not exert direct force or pressure as this may result in breakage.

FANS

Revive the art and sophistication of the hand fan whilst staying cool in the heat. Over 190 years of history, each fan is assembled by hand in France by apprentices of the last master of traditional French fan-making.

Gently open the fan in one direction only. Do not forcefully open the fan;

Avoid humidity, rain and exposure to sources of heat or direct sunlight;

For feather fans, because of the delicate nature of the material, they must be handled with extra care. Avoid contact with chemicals and store upright in the original bag and box;

Store individually in the original SAUVEREIGN protective bag and box when not in use to avoid debris and abrasion; protect from external shock.
